

Hilmy Rifaldi

Summary Profile

Hi, I'm Hilmy Rifaldi as a IT Security Professional with over 3 years of experience designing, implementing, and managing cyber security solutions across the banking and fintech industries. Expertise in Cloud Security, Application Security, Security Operations, Identity Security, and Vulnerability Management, with hands-on experience in cloud security hardening, CIS Benchmark assessments, Cloud WAF administration, Static Application Security Testing (SAST), and Vulnerability Assessment & Penetration Testing (VAPT). Experienced in threat analysis, log correlation, security monitoring, and incident response, enabling faster identification, investigation, and remediation of security incidents. Skilled in developing security metrics and executive reports, improving cloud security posture, and collaborating with engineering, infrastructure, and DevOps teams to integrate security throughout the Secure Software Development Lifecycle (SSDLC). Committed to protecting critical business assets, reducing cyber risk, and driving continuous security improvement through industry best practices.

Education

Bachelor Degree, Telkom University, Bandung

August 2016 — August 2020

GPA : 3.24

Employment History

Customer Service at PT. Shopee International Indonesia, Jakarta

April 2021 — April 2022

- Handle customer inquiries from sellers and buyers through calls.
- Manage and resolve customer related issues and escalations.
- Analyze customer experience reports and insights and come up with improvement suggestions and initiatives.
- Conduct root cause analysis for customer issues and recommend strategies to prevent recurring problems.

Customer Service at PT. Asuransi Jiwa Sealsure, Jakarta

April 2022 — July 2022

- Respond to customer inquiries via phone, email, chat in a friendly and professional manner.
- Identify customer needs, clarify information and provide accurate solutions.
- Analyze data reports from inbound calls, web form and email to improve our services.

IT Development Program at PT. Bank Mega, Jakarta

August 2022 — January 2023

- Learn the soft skills that a person must have, such as communication, leadership, problem solving, critical thinking, logical thinking with a study case on daily life.
- Learn the fundamentals of IT Network, such as routing tables, static routing and dynamic routing protocols like RIP, OSPF or EIGRP.
- Learn the fundamental of IT Security and IT Infrastructure, such as basic access control, basic cryptography, BCP & DRP concept, operating system security, risk assessment, cyber attack concept, virtualization, types of operating system, cloud platform.
- Learn to create a virtualization for running virtual machine on personal computer that can be used to develop web applications with Apache or NGINX and run the basic applications such as WordPress.
- Learn to create Risk Assessment & Risk Analysis from the result of vulnerability assessment data dummy on Banking Industry.
- Learn ITIL to understand how the framework of best practices for managing IT services and understanding its core concepts, processes, and the stages of the IT service lifecycle.
- Learn DevOps on deploy code to production faster in an automated & repeatable way. Automation is at the core of DevOps. Repetitive tasks such as deployment, testing, and provisioning infrastructure are automated to reduce human error, increase efficiency, and speed up delivery.

IT Security Development Specialist at PT. Bank Mega, Jakarta

February 2023 — March 2026

- Deploy, configure, and manage PAM solutions. Integrate PAM solutions with existing IT systems, directory and some of applications in-house.
- Implement workflows for account provisioning, de-provisioning, and periodic review. Monitor privileged sessions and generate audit trails. Set up alerts for anomalous or unauthorized activities.
- Conduct regular reviews of privileged access logs and user activities. Generate reports for audits and management reviews.
- Administer and maintain Active Directory (AD) and/or LDAP environments, including domain controllers, Organizational Units (OUs), Group Policies, and replication.
- Create & Manage REST API from AD/LDAP Open Source for integrate to another applications. Integrate AD/LDAP with enterprise applications or some in-house applications.
- Configure, deploy, and manage firewalls. Implement and maintain security rules, policies, and access controls across firewalls. Manage firewall features like intrusion prevention, content filtering, and VPN access.
- Configure, deploy, and manage load balancing solutions. Optimize load balancing algorithms (e.g., round-robin, least connections, ratio) for application performance and reliability. Set up and maintain health checks to ensure application servers are functioning properly. Ensure efficient load distribution to minimize latency and improve application response times.
- Develop, implement, and manage security policies and procedures for cloud environments (Google Cloud, Huawei Cloud) to ensure the protection of data, applications, and infrastructure.

Sr. Cyber Security Analyst at PT. Akulaku Finance Indonesia, Jakarta

April 2026 — Present

- Implemented and managed Cloud Security controls to protect cloud workloads, ensuring compliance with organizational security policies and industry best practices.
- Conducted cloud security configuration assessments to ensure compliance with CIS Benchmark best practices.
- Configured and managed Cloud Web Application Firewalls (WAF), to enhance infrastructure resilience.
- Conducted Static Application Security Testing (SAST) to identify and remediate security vulnerabilities during the Software Development Lifecycle.
- Performed Vulnerability Assessment and Penetration Testing (VAPT) activities for internal application, analyzed

findings, prioritized remediation efforts, and collaborated with development teams to improve application security.

- Monitored cloud environments for security events, suspicious activities, and compliance violations while supporting incident investigation and response.
- Developed dashboards and security reports to improve visibility into security events, vulnerabilities, and operational metrics.
- Delivered Security Awareness sessions to improve employee understanding of cyber security risks, phishing attacks, password security, and security best practices.
- Contributed to the continuous improvement of cyber security governance, risk management, and operational security processes.
- Prepared monthly Security Posture Reports summarizing security risks, vulnerabilities, cloud security report, threat intelligence findings, and remediation progress for management review.
